

Teresa M. Young

VIRTUAL EVENTS PRODUCER

Small Business Virtual Events

All businesses benefit from outside professional support along the way.

Using proven strategies gained over 30+ years in business, I and my team execute 360° virtual event support. Already, national organizations have called upon me to provide full-service virtual event support. Now, local businesses can access their attendees with our low cost studio streaming venue. Whether it is a fundraiser, a person teaching QuickBooks, a music teacher, or any other activity that wants to move online, they can now sell tickets or offer free classes with professional assistance. I am still on a mission that I chose in 1982, to empower entrepreneurs, executives and leaders to grow their businesses. I have a series of businesses, all connected, that have fed that purpose for over 30 years. Whether teaching yoga and selling tickets, or streaming an interview to a board of directors, the systems and state-of-the-art technology we employ will make it happen.

♥♥ *My passion is helping entrepreneurs and associations achieve their vision for growth with new resources. When I am requested as a keynote speaker or virtual event consultant, I am in my wheelhouse. My high-touch, personalized approach helps leaders improve their online presentations and brand messaging at all levels, while expanding their opportunities for virtual trainings, fundraisers, and events.*

About Me

Partnering

I been a consultant to entrepreneurs since 1986, in both retail and B2B sectors. I served as chairwoman of the International Sign Association (2007), the only woman to hold this role. Later, I became the Chair of the California Sign Association. Today, I sit on multiple boards including the Dynamic Signage Expert Group, Editorial Boards, and others. Before 1986, I chose to work with Michael Gerber, Author of the E-Myth, a business classic. His systems approach is one that I took with me to launch more than 200 new entrepreneurs into their own businesses across 44 states and six countries.

Today, I am one of only a few authorized OnZoom hosts in North America. This new Zoom platform allows us to offer a rewarding and seamless virtual event platform, fully virtual, or hybrid in our studio.
